Raise & lower
pole solutions.

Unmatched
ease of use.

We have rethought pole solutions. With innovative raise and lower poles.

A revolution for installation and operation. SITECO pole solutions require no cranes for installation or for maintenance and service.

Simply lower the poles and work on the fixture system in comfort. With heights from 20' to 165', we have the right solution for every sports application.

Up to **80** %
lower maintenance
and installation costs.

Only **1** person
for annual maintenance.

No crane
for the installation and maintenance.

Raise and Lower Poles.

Fast, low-impact installation.

Ground-level installation using small machinery - no need for heavy equipment or complex logistics.

Enhanced safety.

All maintenance performed at ground level - eliminates climbing and working at height.

Flexible configuration.

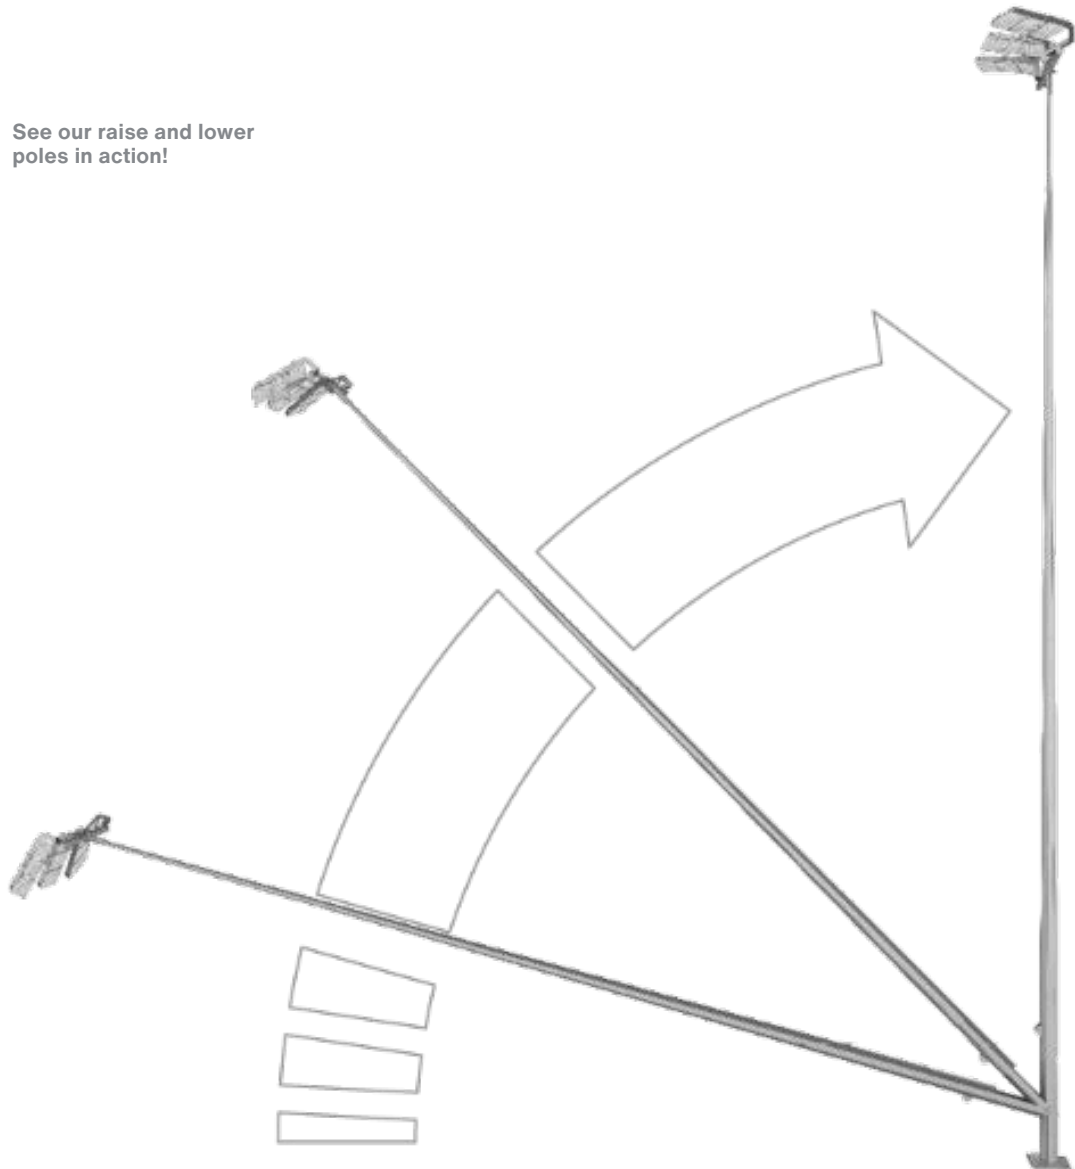

Multiple designs available to match head weight and wind load; wide selection of standard poles plus custom engineering options.

Cost-efficient life-cycle.

Comparable upfront cost to static poles - but with no crane rental or access platform expenses, and significantly lower total life-cycle cost.

See our raise and lower poles in action!

Foundation Options

Flexible foundation solutions.

Wide range of foundation types available.

Tailored to site-specific conditions.

Foundations are engineered based on ground conditions, location, pole headload, and wind exposure - fully customized to project requirements.

In-house structural & mechanical engineering.

Dedicated experts support foundation design and specification.

Foundation design

Inhouse foundation design and engineering for different foundation types.

- Spread footing foundation.
- Pier foundation.
- Root mounted foundation.
